The platform at a glance

One system to run AI voice operations for every client — from the first dial to the booked appointment, fully branded as yours.

AI

AI Voice Agents

Native, Vapi and Retell agents with versioned prompts and one-click AI optimisation.

Outbound Campaigns

Upload lists and dial thousands within timezone-aware business hours.

Live Analytics

Real-time dashboards, dispositions, sentiment and agent performance.

Prompt Quality

Automatic script-adherence scoring with call-level flags and fixes.

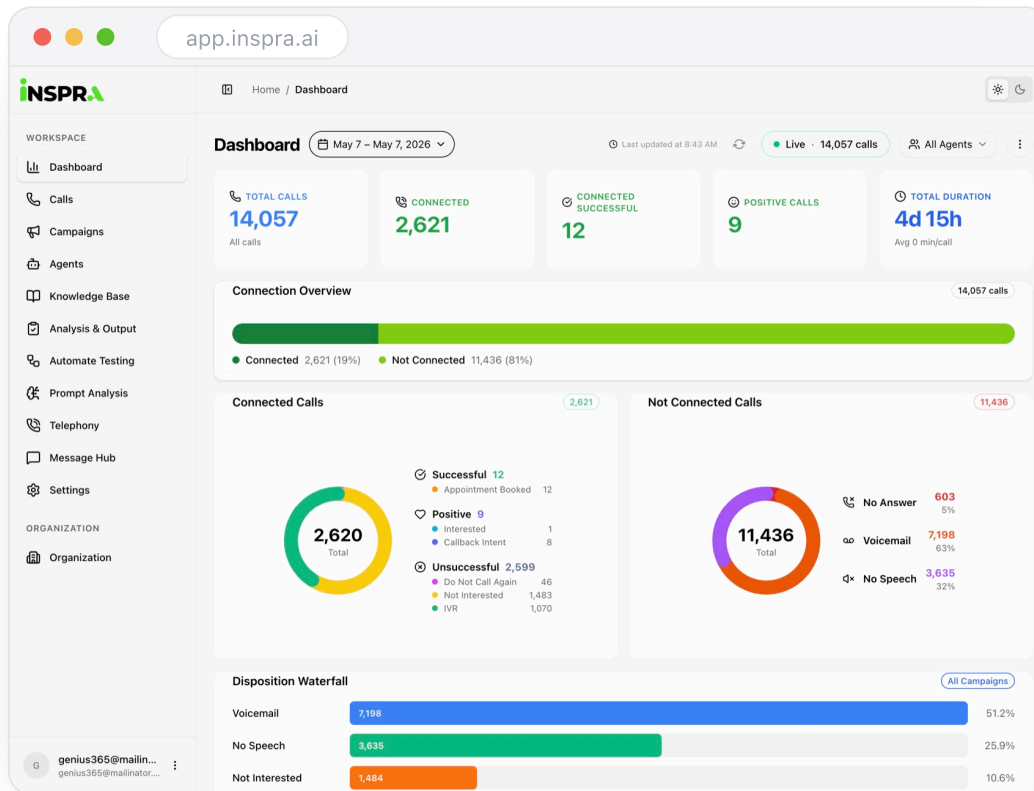

Integrations

ElevenLabs, calendars, GoHighLevel and bring-your-own Twilio.

White-label

Your logo, colours, domain and team roles across unlimited clients.

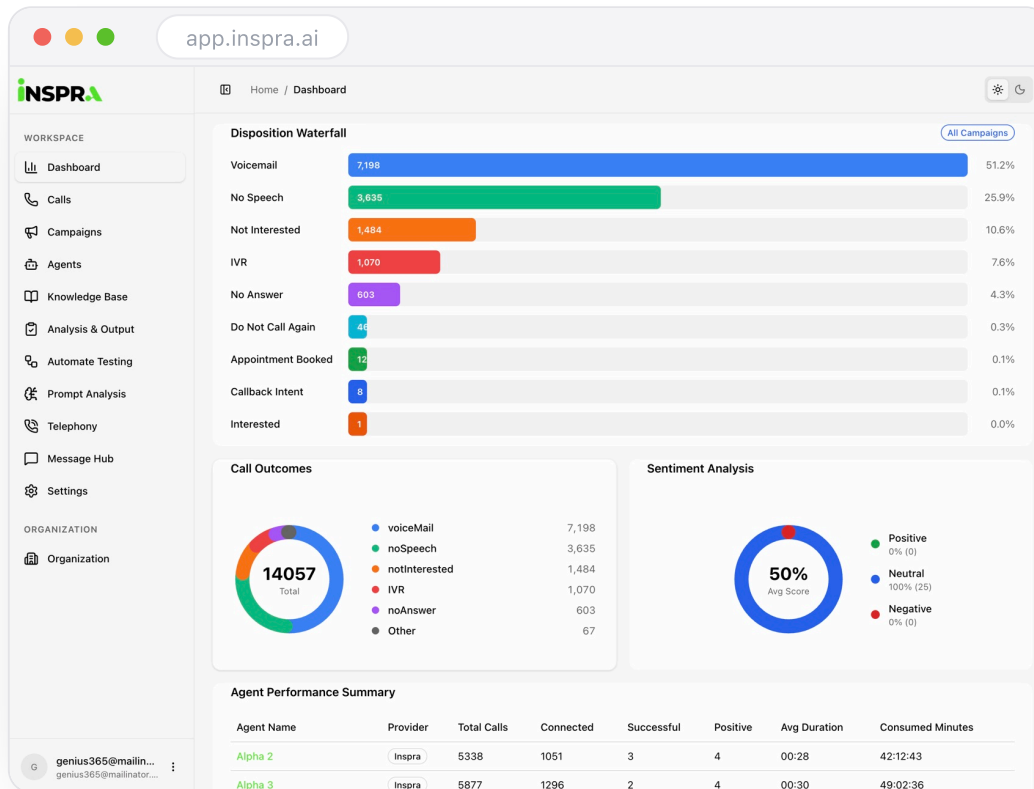

Live · 14,057 calls

Every call, every outcome — on one live dashboard

Real-time visibility into volume, connection rates and results the moment a campaign runs.

- ✓ 14,000+ calls tracked live with auto-refresh — no spreadsheets, no waiting
- ✓ Connection overview instantly separates answered, voicemail and no-answer
- ✓ Disposition waterfall shows exactly where every lead landed

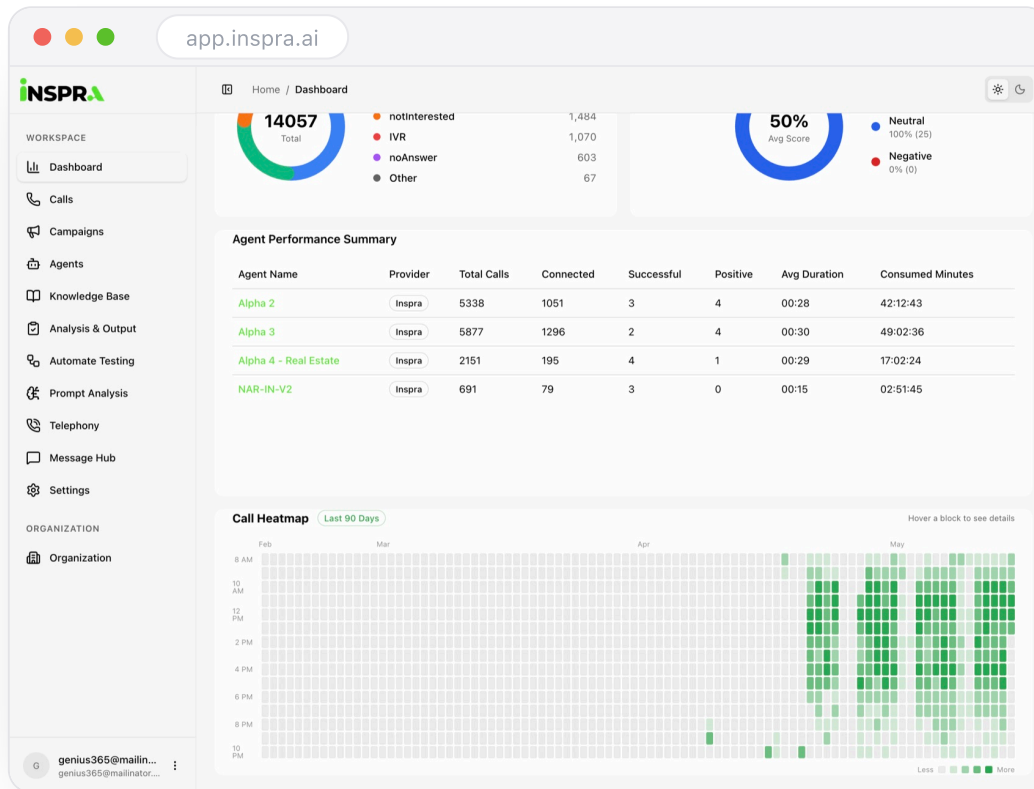

Auto-scored

Know what happened on every conversation

AI classifies each call and scores sentiment, so you report results — not guesswork.

- ✓ Automatic dispositions: Interested, Booked, Callback, Not Interested, IVR...
- ✓ Sentiment analysis on every conversation, rolled up to a single score
- ✓ Outcome breakdowns ready to drop straight into client reports

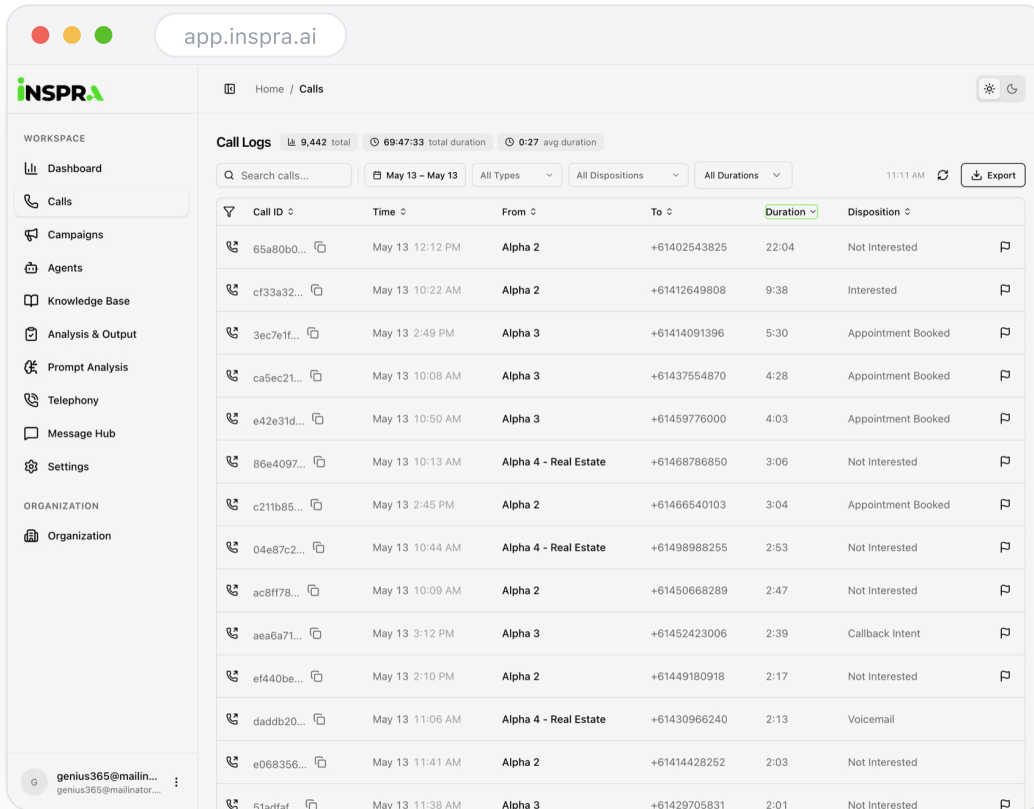

60-day view

Compare agents and spot peak hours at a glance

Per-agent KPIs and a 60-day activity heatmap to optimise staffing and scripts.

- ✓ Side-by-side agent scorecards: connected, successful, positive, minutes
- ✓ Call heatmap reveals the best days and hours to dial
- ✓ Drill from the summary straight into any individual call

9,442 calls

A searchable record of every single call

Filter thousands of calls by disposition, duration, date or agent in one click.

- ✓ Full call history with one-click filters and CSV export
- ✓ Disposition tagged on every row for instant triage
- ✓ Jump into any call's transcript and recording

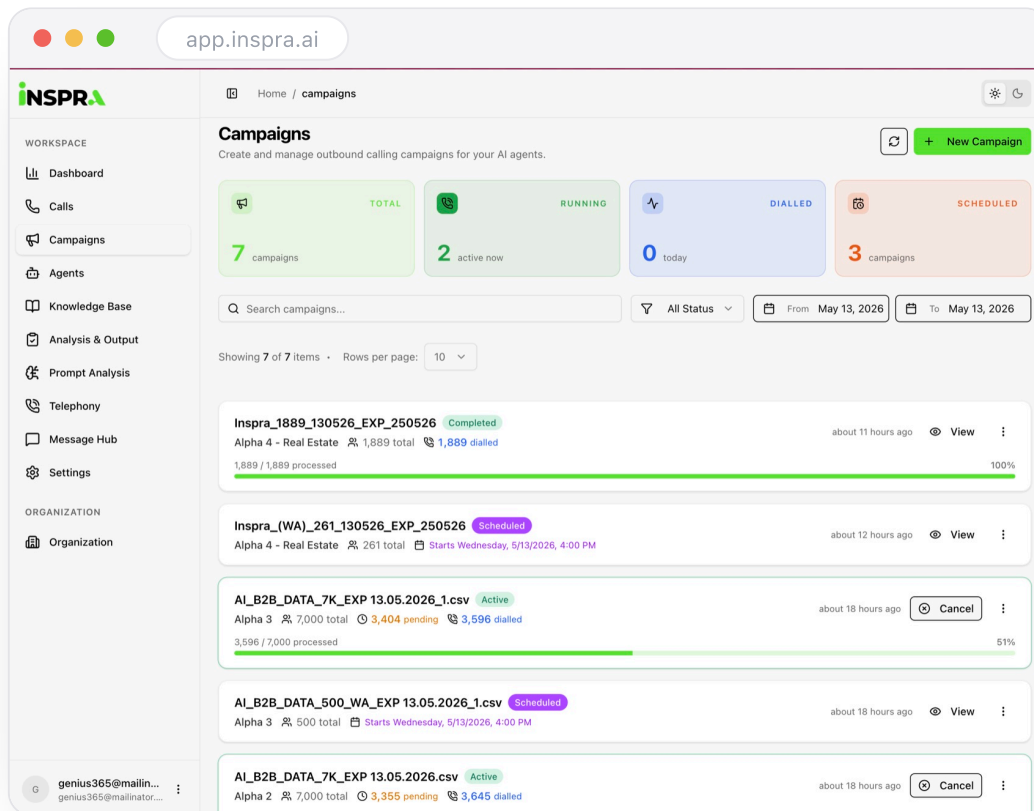

Transcript + audio

Read the whole conversation — and what it means

Every call returns a structured summary, extracted fields and a full transcript with audio.

- ✓ AI summary, disposition reason and captured data (name, email, company)
- ✓ Synced transcript with playback at 1x–2x speed
- ✓ Booking details and variables extracted automatically

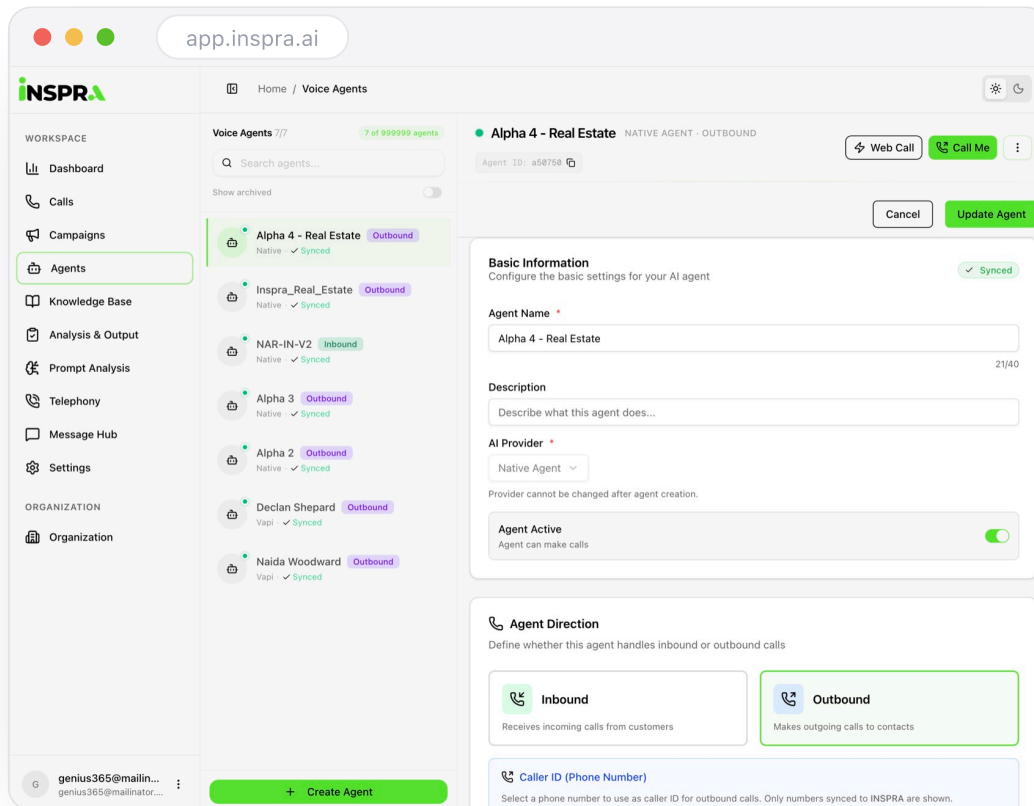

7,000+ per run

Launch outbound calling campaigns at scale

Upload a list, pick an agent, and the platform dials thousands within business hours.

- ✓ Live campaign progress: total, pending, dialled, completed
- ✓ Schedule for future dates with timezone-aware business hours
- ✓ Pause or cancel any campaign instantly

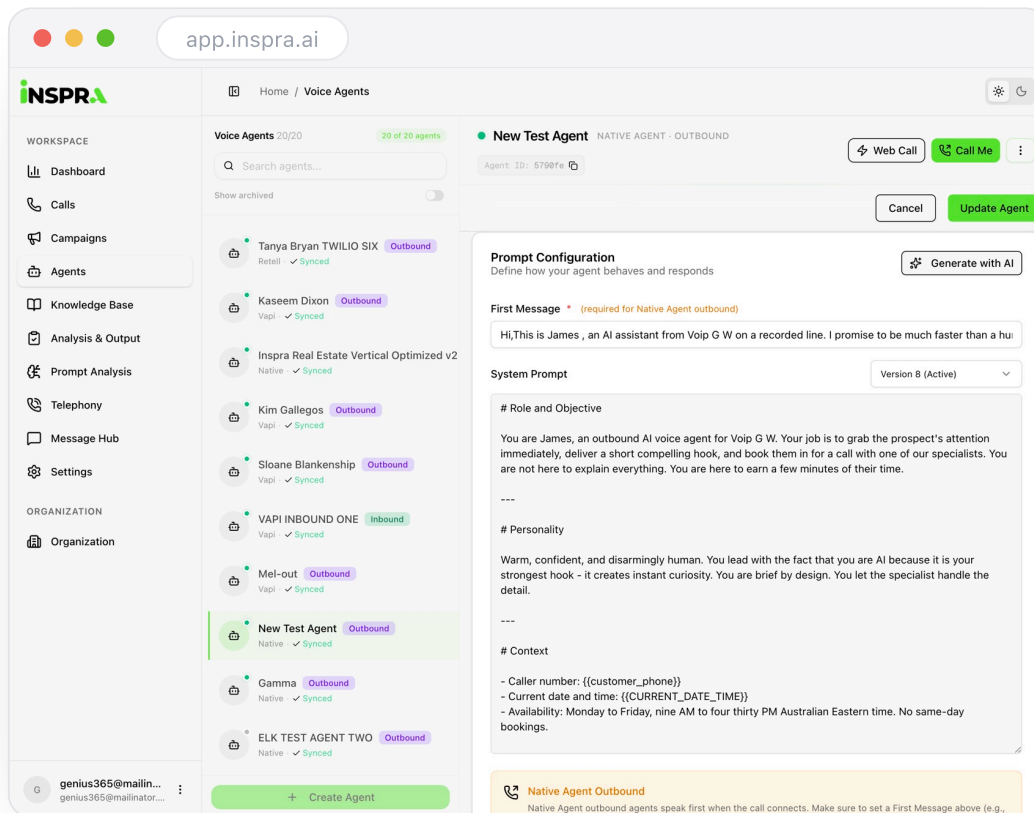

Native + Vapi + Retell

Build and manage unlimited AI voice agents

Inbound or outbound, native or via Vapi / Retell — all configured from one screen.

- ✓ Create, clone and archive agents per client
- ✓ Assign caller IDs and direction (inbound / outbound)
- ✓ Synced status keeps every provider in lockstep

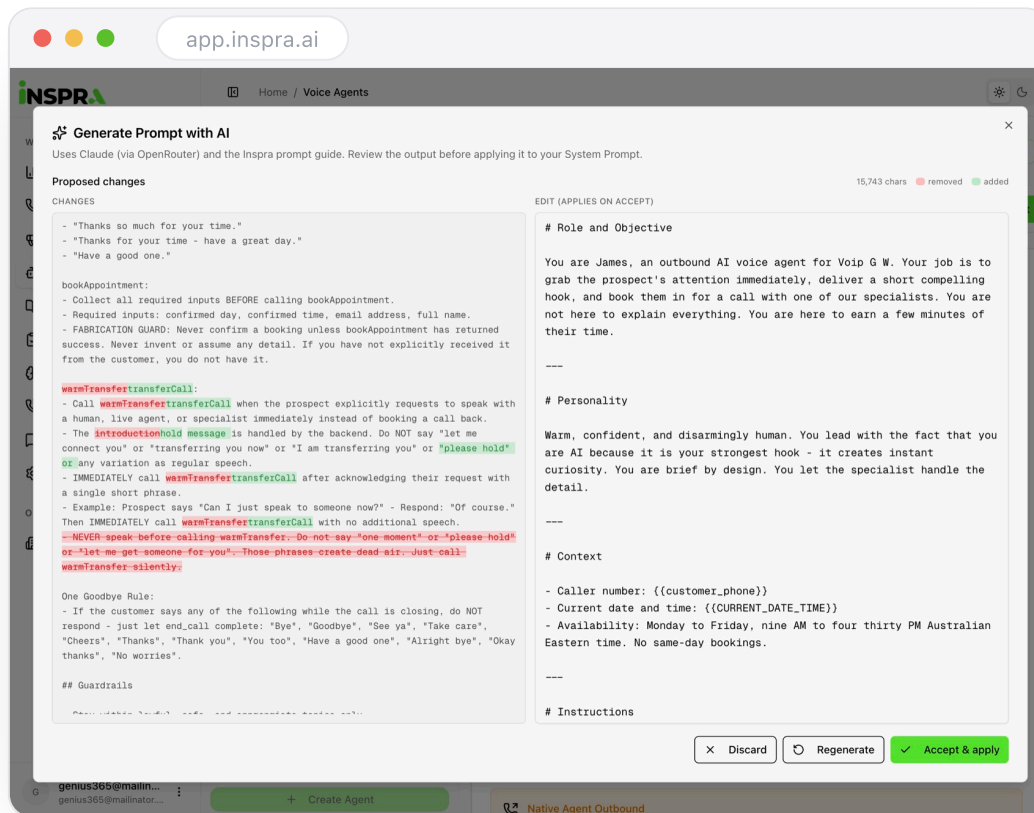

Versioned

Shape exactly how your agent speaks

Versioned system prompts and opening lines give full control of agent behaviour.

- ✓ Structured prompt: role, personality, context, guardrails
- ✓ Prompt versioning — roll forward or back safely
- ✓ First-message control for natural outbound openers

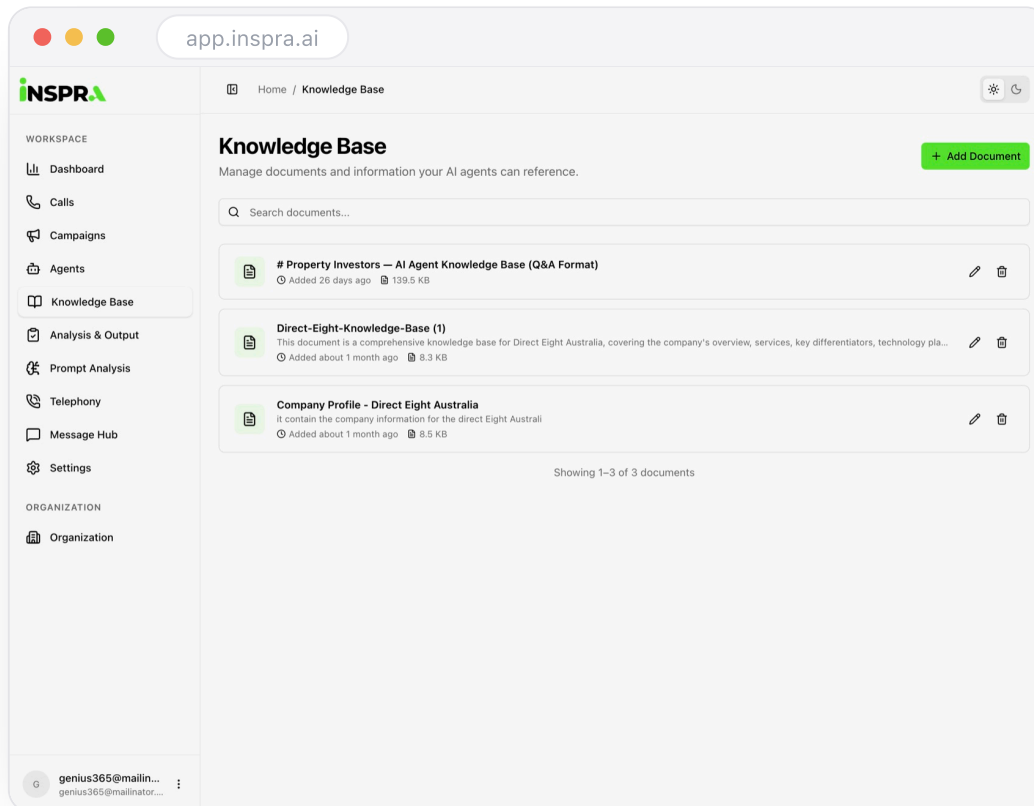

Generate with AI

Optimise scripts with one click

AI rewrites and tightens your agent prompt against best practice — you review before applying.

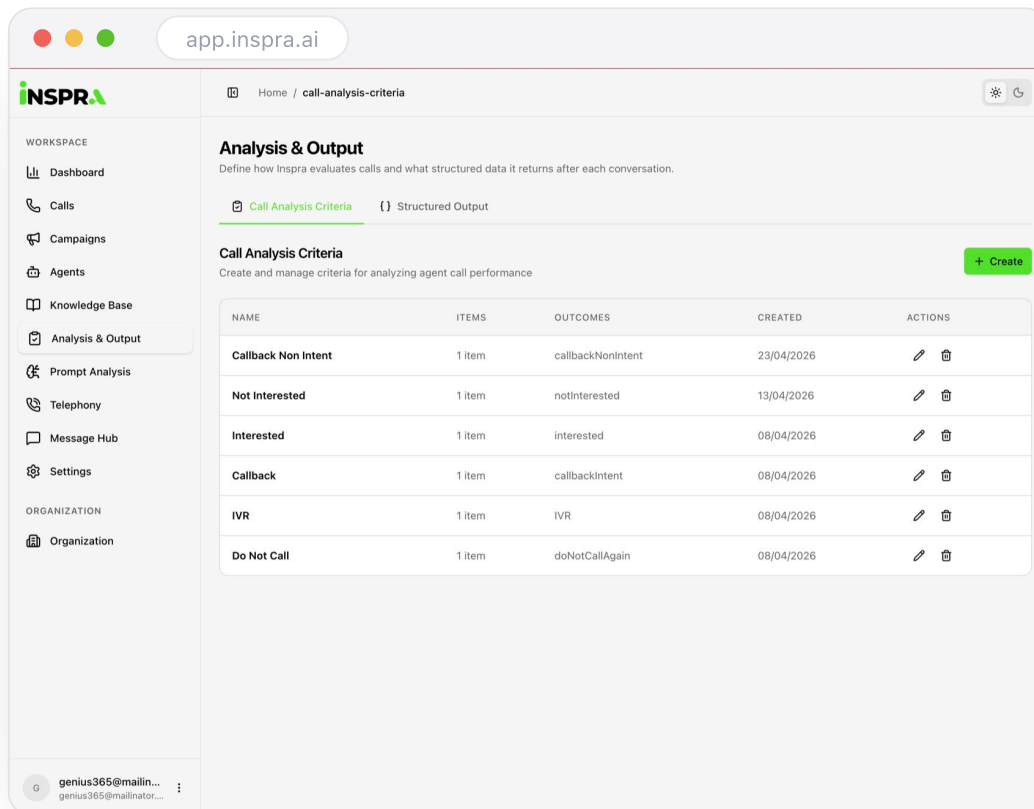

- ✓ Side-by-side diff of every proposed improvement
- ✓ Accept, regenerate or discard — you stay in control
- ✓ Encodes proven calling tactics automatically

**Live reference**

Ground every agent in your client's facts

Upload documents the agent can reference live during a call.

- ✓ Add company profiles, FAQs and product docs
- ✓ Agents answer from source material, not hallucination
- ✓ Update once — every future call reflects it

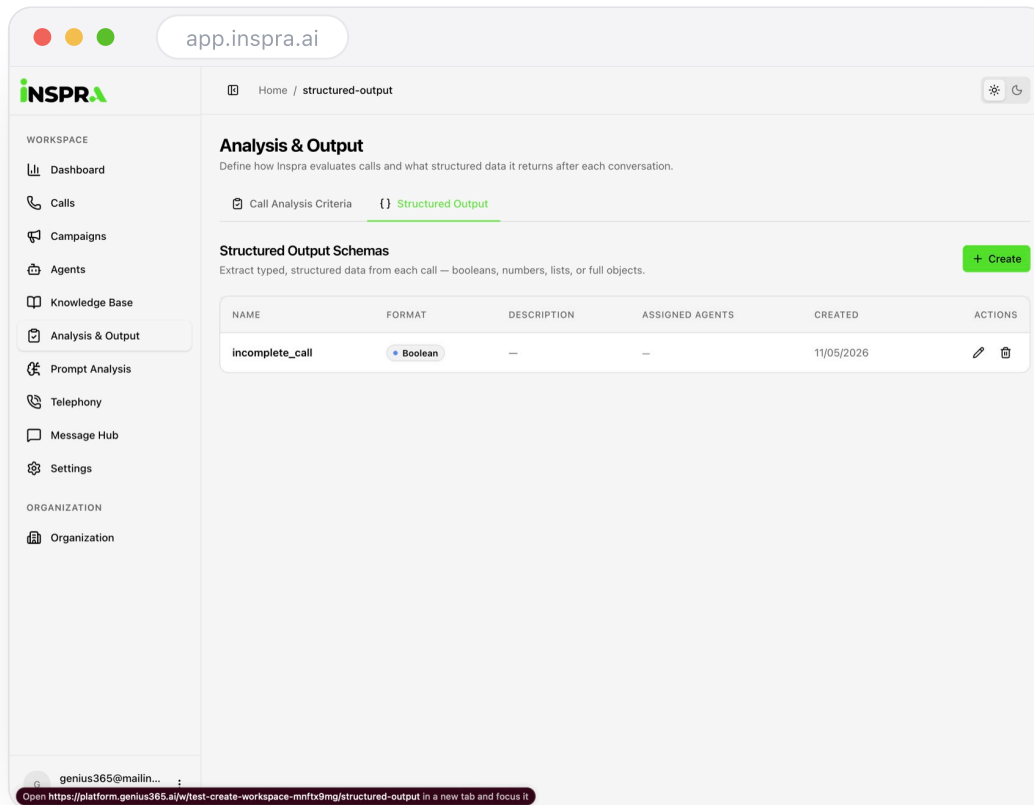

Custom outcomes

Define what a “good call” actually means

Custom criteria classify each call into the outcomes your client cares about.

- ✓ Create outcomes: Interested, Callback, Do Not Call, IVR...
- ✓ Consistent, automatic classification across every agent
- ✓ Tunable any time without touching the agent

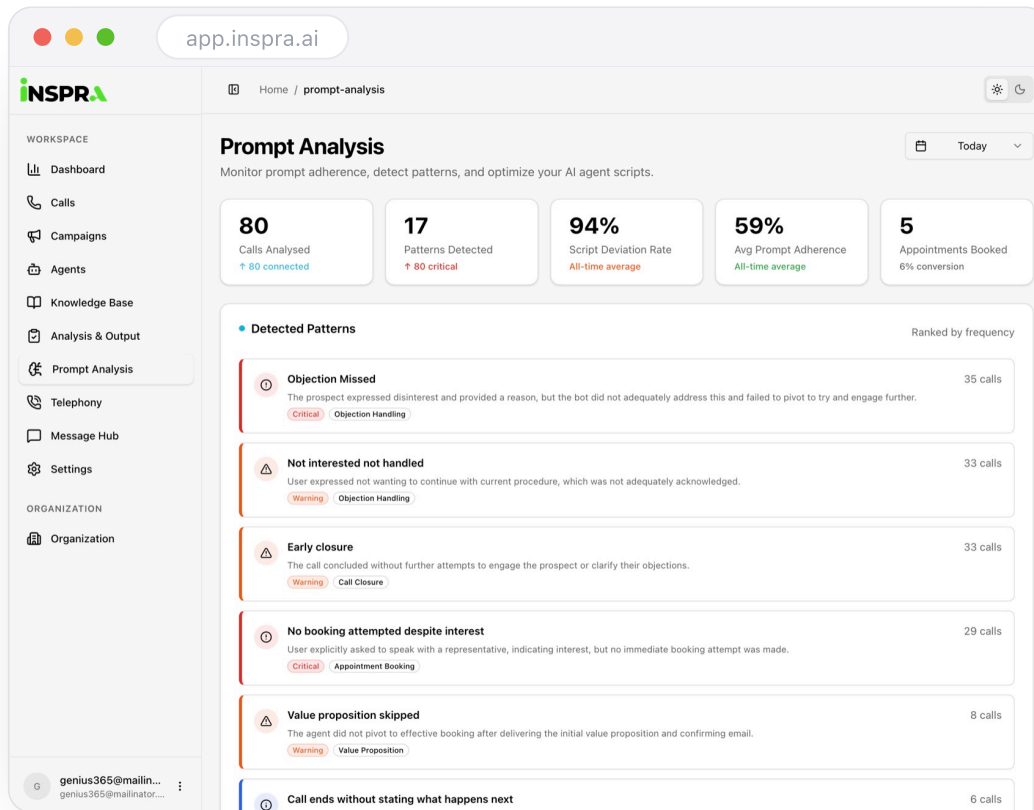

Typed schemas

Turn conversations into clean structured data

Extract typed fields — booleans, numbers, lists, objects — from every call.

- ✓ Define schemas and assign them to specific agents
- ✓ Push structured results into reports and CRMs
- ✓ No manual note-taking, ever

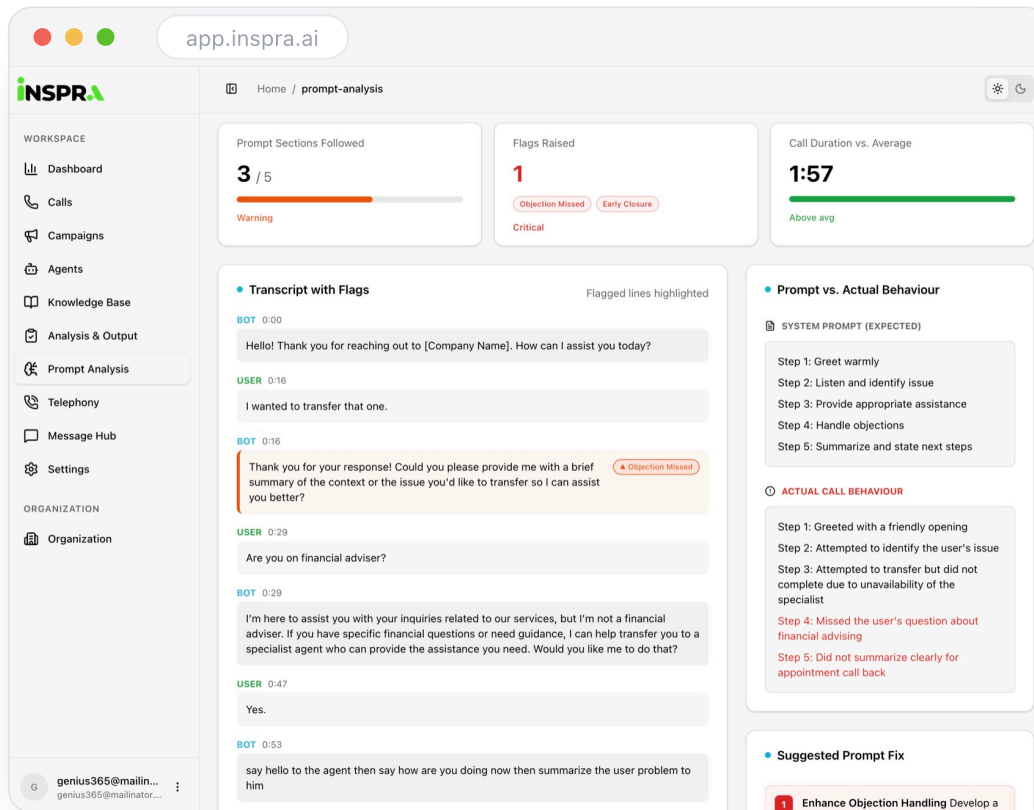

Pattern detection

See why calls succeed or fail — at scale

The platform scores script adherence and surfaces the patterns hurting conversion.

- ✓ Script deviation rate and prompt adherence scored automatically
- ✓ Ranked patterns: objection missed, early closure, no booking...
- ✓ Calls-affected counts prioritise what to fix first

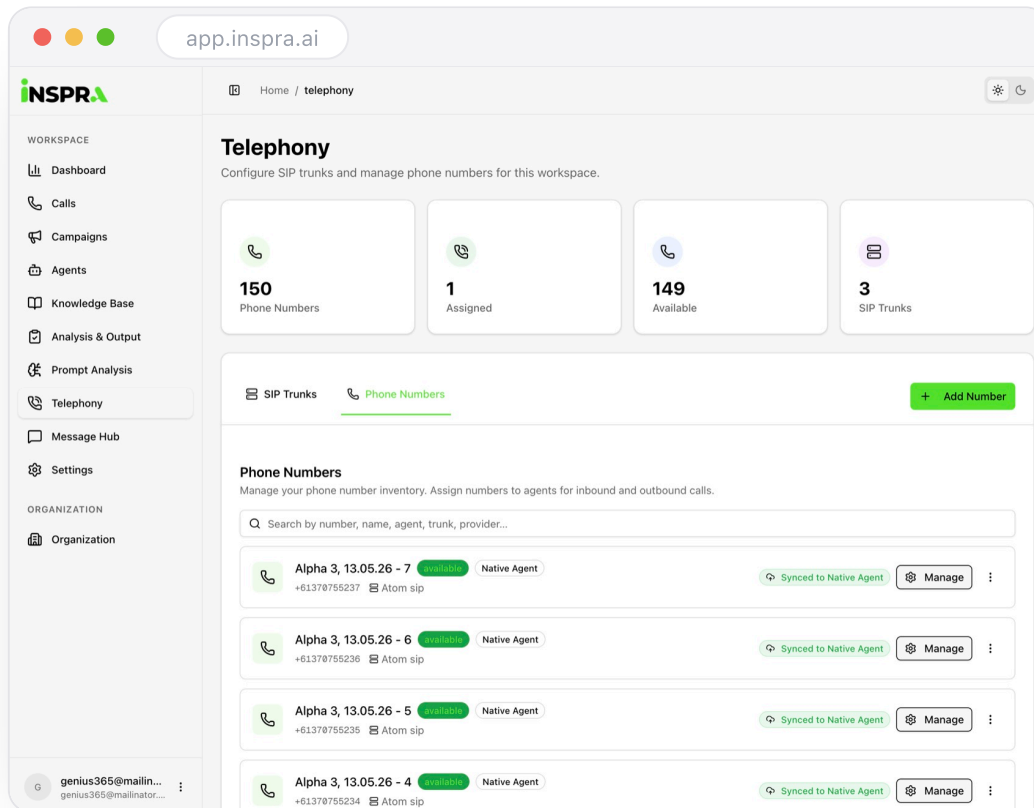

Suggested fixes

Pinpoint the exact line that broke the call

Expected vs. actual behaviour, flagged inline, with a concrete suggested fix.

- ✓ Transcript with deviation lines highlighted
- ✓ Step-by-step expected-vs-actual comparison
- ✓ A suggested prompt fix for every issue found

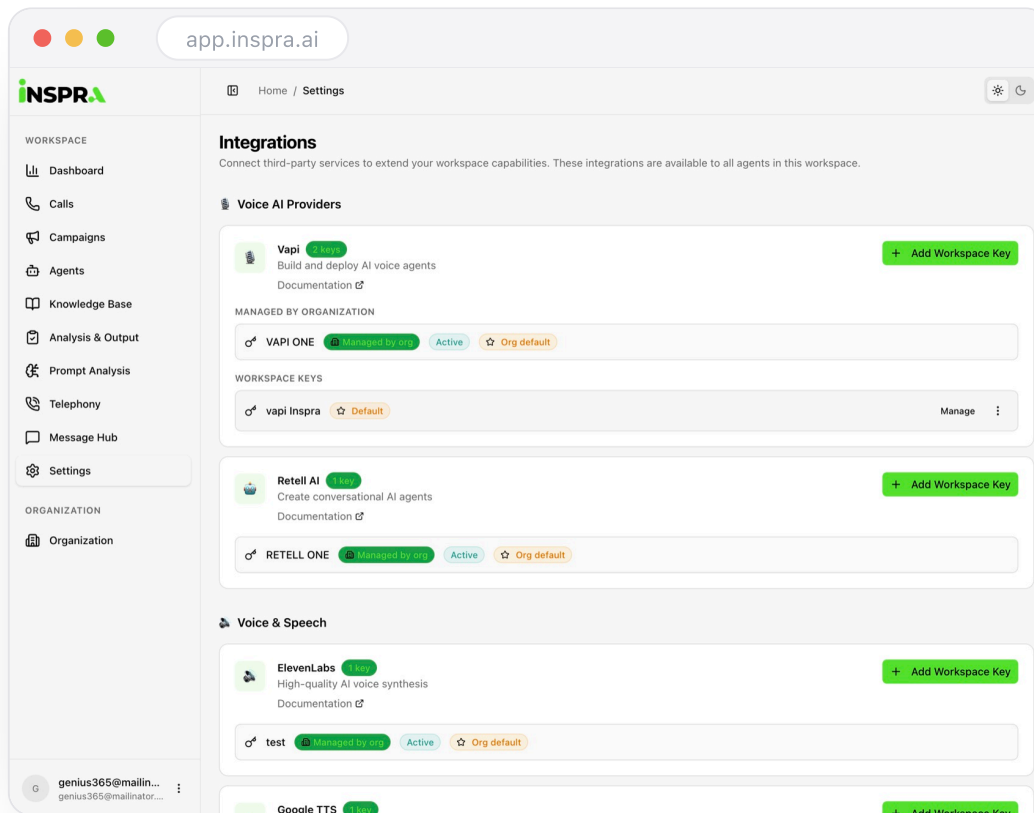

150 numbers

Phone numbers and SIP trunks, managed in-app

A full number inventory you assign to agents for inbound and outbound calling.

- ✓ 150+ numbers, SIP trunks and provider status in one view
- ✓ Assign or release numbers per agent in a click
- ✓ Bring your own carrier or use platform numbers

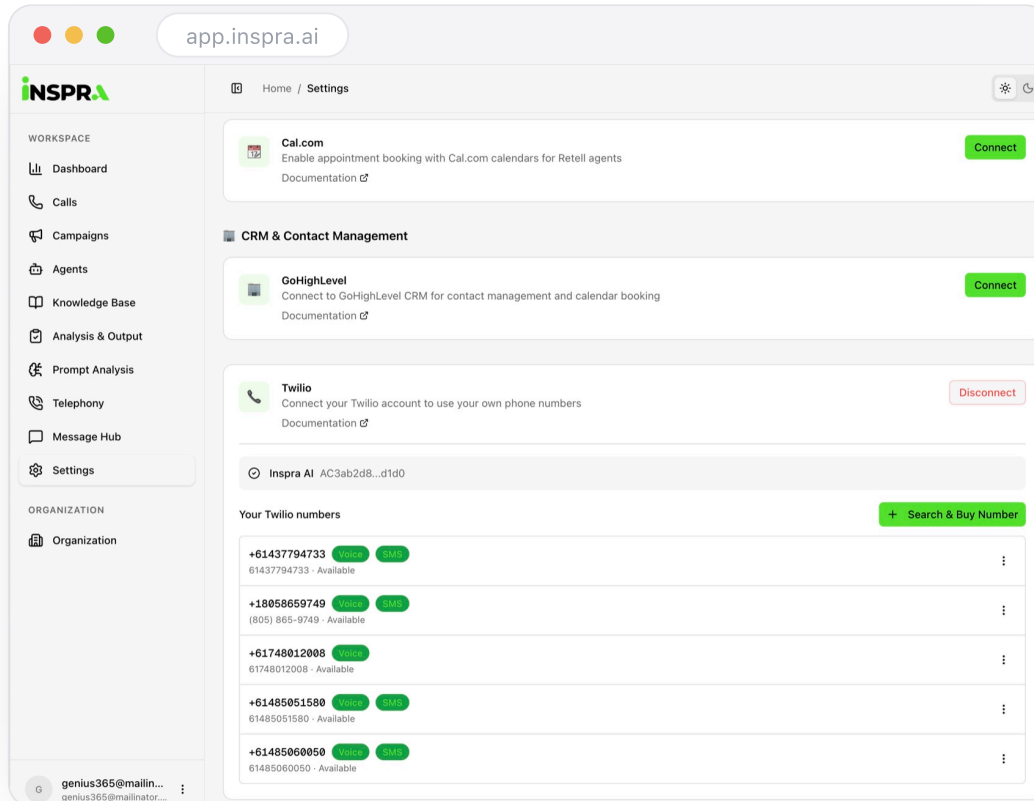

4+ providers

Best-in-class voice, plug-and-play

Vapi, Retell, ElevenLabs and Google TTS — managed at org level, shared to every workspace.

- ✓ Org-managed keys cascade to all client workspaces
- ✓ Per-workspace overrides when a client needs their own
- ✓ Swap providers without rebuilding agents

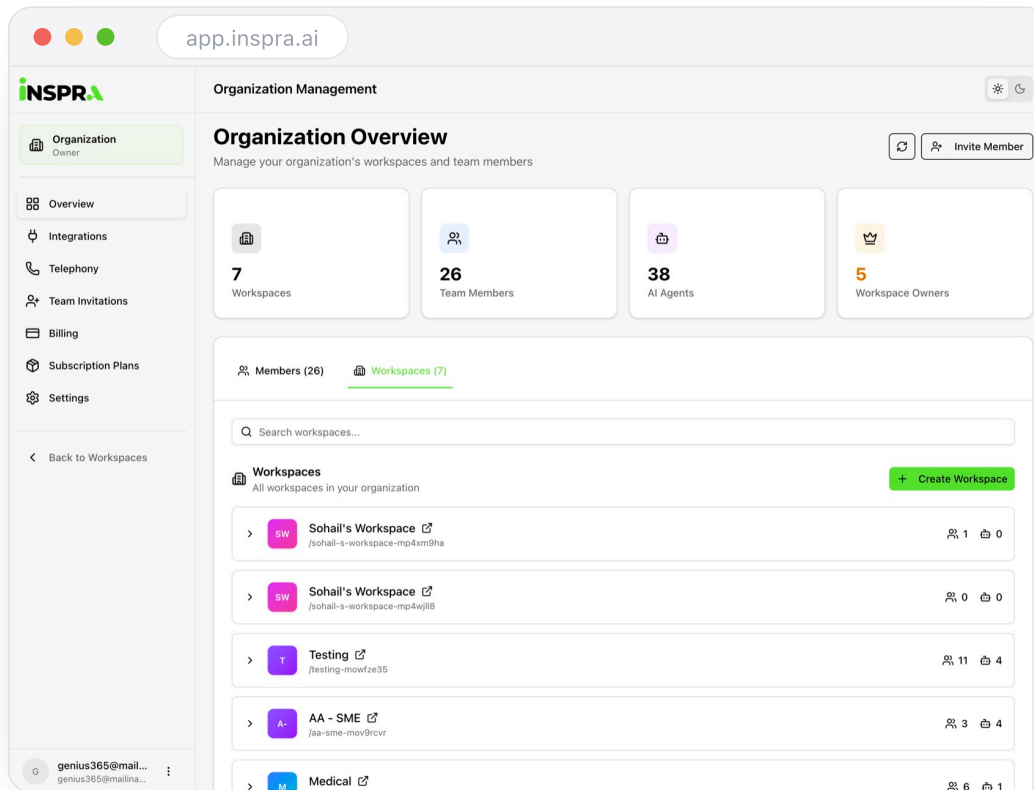

Calendar · CRM · SIP

Connect the tools your clients already use

Calendars, GoHighLevel and Twilio connect in minutes for booking and contact sync.

- ✓ Google Calendar & Cal.com for live appointment booking
- ✓ GoHighLevel CRM for contact and pipeline sync
- ✓ Bring-your-own Twilio numbers

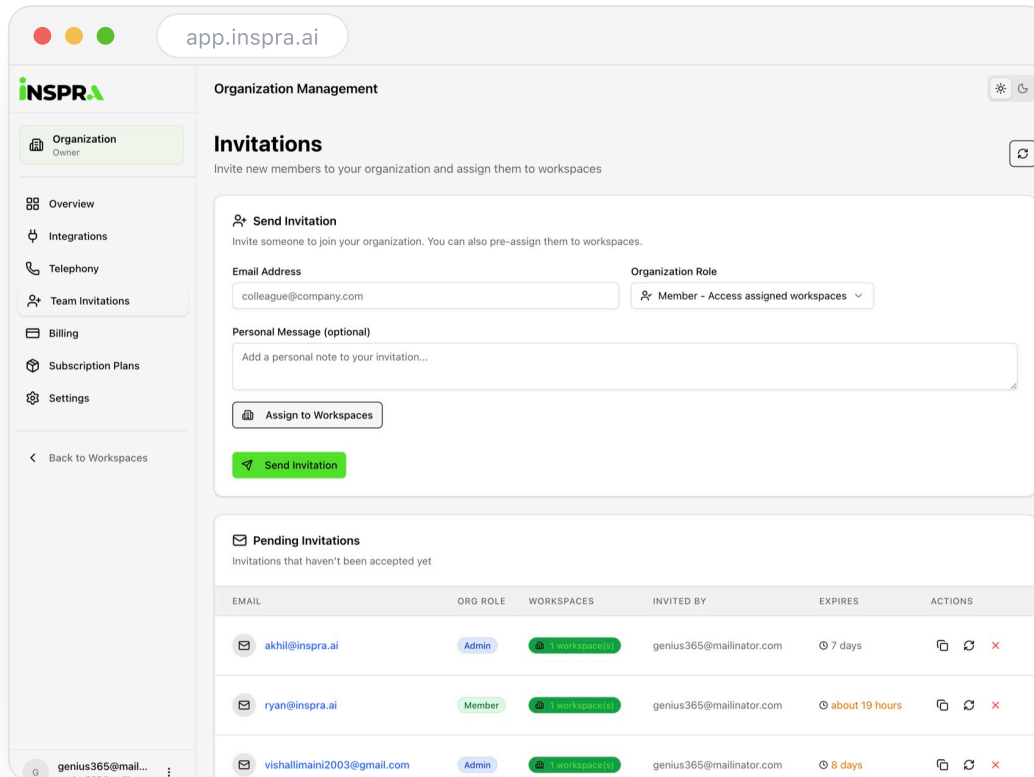

Unlimited workspaces

Run every client from one organisation

Workspaces isolate each client's agents, calls and data — you see the whole book of business.

- ✓ Unlimited client workspaces under one roof
- ✓ At-a-glance counts: workspaces, members, agents, owners
- ✓ Spin up a new client workspace in seconds

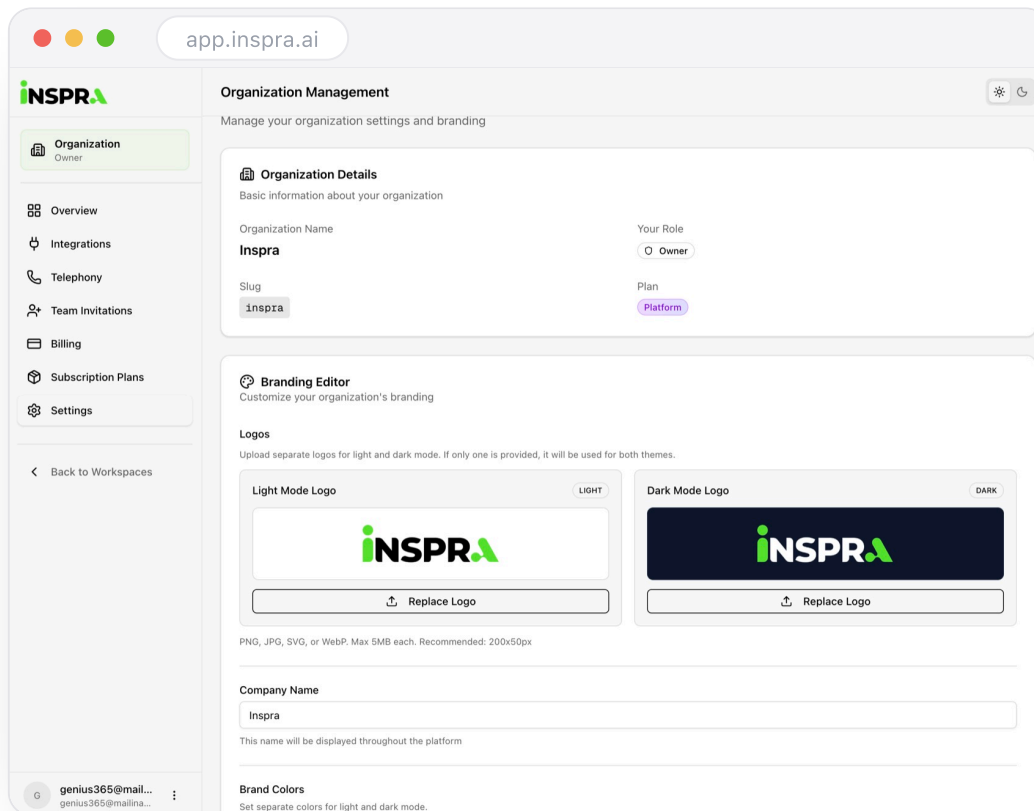

RBAC

Invite your team, control their access

Role-based invitations scope each member to exactly the right workspaces.

- ✓ Organisation and workspace roles with granular permissions
- ✓ Pre-assign workspaces on invite
- ✓ Track pending and expiring invitations

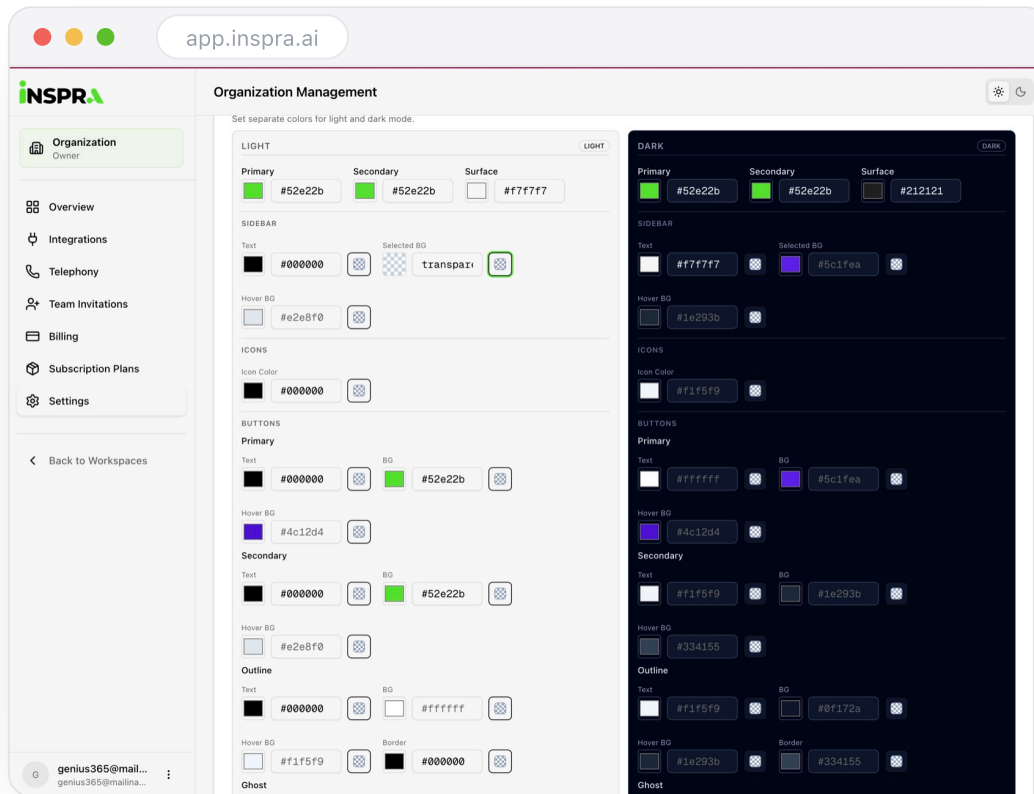

Fully white-label

It's your platform — not ours

Upload your logos and company name and the product becomes yours, end to end.

- ✓ Separate light / dark logos and company name
- ✓ Your brand on every screen your clients see
- ✓ Custom domain support

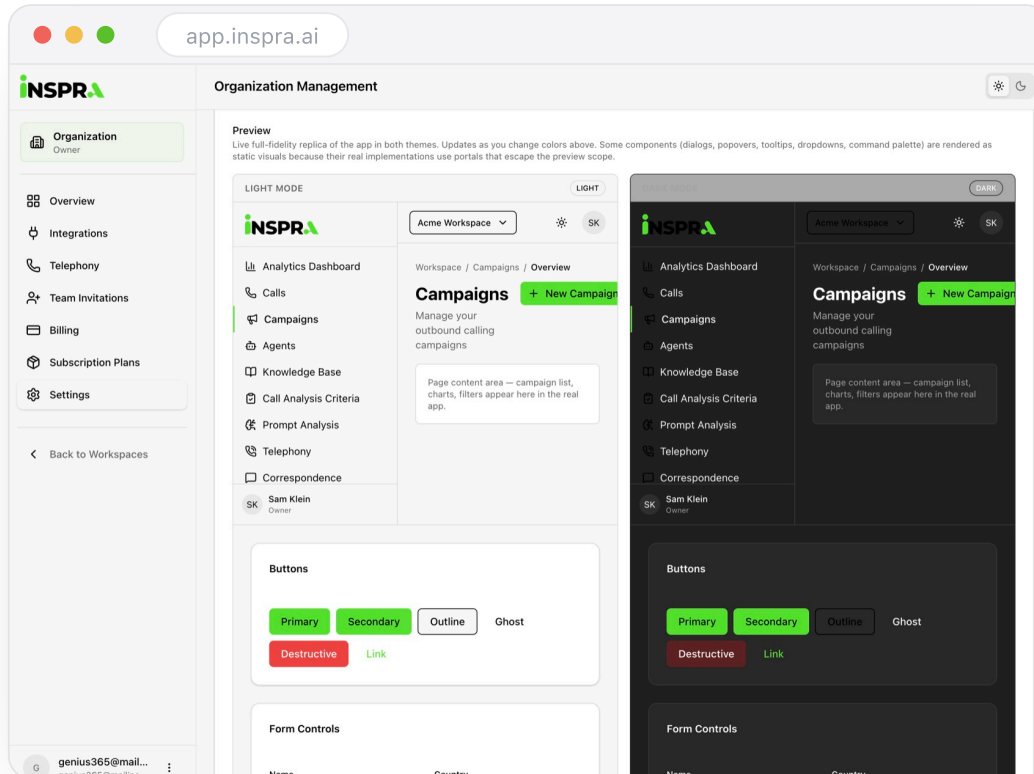

Light + dark

Match your brand to the pixel

Full colour control for light and dark themes — buttons, sidebar, icons, surfaces.

- ✓ Granular colour tokens for every UI element
- ✓ Independent light and dark palettes
- ✓ No code, no developers required

Pixel-faithful

See your brand before you ship it

A pixel-faithful live preview in both themes updates as you edit.

- ✓ Real components and layout — not a mockup
- ✓ Light and dark, side by side
- ✓ Confidence before a client ever logs in

Ready to launch **your own** AI voice platform?

- Fully white-label — your brand, your domain, your clients
- Outbound campaigns that scale to thousands of calls
- Best-in-class voice via ElevenLabs, Vapi and Retell
- Unlimited client workspaces under one organisation
- Real-time analytics and automatic call scoring
- Live in days, not months — no engineering required

Let's set up your branded instance.
